1. The amendment filed on 1/13/06 has been received and entered in the case.
2. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.
3. Claims 1-5 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The amendment to claim 1 is misdescriptive, and therefore indefinite, i.e., it is incorrect to recite that the reference voltage generation circuit "includes" the first switching circuit (lines 6-7 of amended claim 1), because line 7 of the claim recites that the reference voltage generation circuit is "connected to" the first switching circuit. These two limitations are inconsistent with each other and thus it is not clear to the examiner how these two features of the invention are related to each other.
4. Claim 1 is rejected under 35 U.S.C. 102(e) as being anticipated by Kim.

See paragraph four of the previous office action for the details of this rejection.

5. Claims 2-5 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

6. Applicant's arguments filed on 1/13/06 have been fully considered but they are not persuasive.

The argument that the delay 14 in Kim merely delays an output signal of flip-flop 12, and sends a delayed signal to a NMOS [sic] transistor" is not persuasive. As noted in the previous office action, Kim's delay 14 includes switching elements and, moreover, the output of this delay turns on FET MN1, thereby allowing supply voltage VDD to be applied to circuit 16 (which can clearly be interpreted as starting circuit 16 using the broadest reasonable interpretation).

The further statement by applicant that circuit 16 in Kim "only detects whether a power supply voltage is less than or equal to a threshold value" is also not sufficient to overcome the outstanding rejection because even if this assertion were

true, it is not understood how this overcomes the rejection based on Kim.

7. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Kenneth B. Wells whose telephone number is (571)272-1757. The examiner can normally be reached on Monday through Friday from 8:30am to 5:00pm.
